### Additional Notes

- **Google Maps is a paid service.** Charges apply based on usage after free tier limits.
- Using Google Maps will auto-fetch full customer address details based on the location.
- Free Map only provides **exact latitude and longitude**, no address conversion.
- Google Maps enhances customer experience with street names, landmarks, and city info.
- With Free Map, customers must manually enter or confirm their address details.
- Google Maps includes geocoding (LatLng to Address) and reverse geocoding features.
- Free Map is suitable for small-scale, location-based delivery where address precision is not critical.
- If you switch to Google Maps, make sure to set a valid API key with billing enabled.
- Google Maps may improve delivery accuracy and reduce customer address-related errors.
- Choose wisely: Free Map has no cost but offers minimal address intelligence.
